Coordinating Climate-
Resilient Development

Master Class Sector Integration

Targeted Topics Forum, Fiji
February 2018

Introductions

Please share:

- Your name
- Your position (role and Ministry/organization)
- Why you chose this Master Class on sector integration

Session Overview

**Integrating adaptation in sectors:
Approaches and key questions**

**How the Pacific community is mainstreaming
climate change across its departments**

Sylvie Goyet

Director, Climate Change and Environmental
Sustainability

Pacific Community | Communauté du Pacifique

**The Government of Fiji's Climate Change and
Health Strategic Action Plan**

Kelera Oli

Climate Change and Health Officer at Fiji's Ministry of
Health and Medical Services

Discussion

What do we mean by sector integration?

- Considering the risks and opportunities that climate change impacts present for sectors
- Accounting for these risks and opportunities in planning in key sectors
- Making adjustments based on integration of climate change adaptation considerations:
 - In how things are done
 - In what is prioritized
 - In how institutions are organized
 - In what is monitored and evaluated

A spectrum of approaches

Grenada

Sectors had already begun integrating adaptation considerations, but coordination was missing: NAP focal agency took stock of ongoing adaptation efforts to identify gaps and priorities for climate-proofing its national development plan.

Brazil

Jamaica

Albania

Prepared an umbrella document to provide national-level policy orientation, with inputs from different sectors and agencies. Sectors are expected to use this document and the priority areas it identifies to bolster adaptation considerations in their own policies and plans.

Philippines

National Climate Change Action Plan outlines a long-term program to address climate change. Climate Change Commission coordinates involvement of stakeholders from relevant agencies, ministries, etc. to implement it.

Sector Driven

- Sectors have already taken steps to address adaptation
- Integration involves coordination of sectoral initiatives to define coherent national adaptation priorities

Hybrid

- Adaptation simultaneously considered at overarching national level and in sector-specific planning
- Integration involves coordination of national and sectoral efforts to ensure cohesion in policy community

Nationally Driven

- NAP focal agency identifies adaptation priorities
- Integration requires uptake within sector plans and policies, with coordination and support from the focal agency

Mapping ourselves on the spectrum

Key questions

- What capacities are needed to support sector integration?
- Who needs them?
- What information and analysis is needed to facilitate sector integration?
- What are the institutional enablers for integration in sectors?
- How to ensure that the NAP process and sector integration are mutually reinforcing?
- How do you translate integrated planning into action?

Discussion

What seem to be the common success factors between the two examples presented?

Discussion

How can you put these success factors in place in your context?
